Education

KIET Group of Institutions — Ghaziabad, India
B.Tech in Computer Science Engineering — CGPA: 8.3 — *2024 – 2028*

DPS Jankipuram — Lucknow, India
Class XII: 89% — Class X: 95%

Technical Skills

Languages	:	C, Java, JavaScript, SQL, Python
Data Engg. & AI	:	LangChain, LangGraph, Agno, LLMs, Generative AI, RAG Pipelines, Vector Search, OCR, OpenCV
ML & Deep Learning	:	Supervised & Unsupervised Algorithms, XGBoost, Transformers, NLP, CNN, RNN, SHAP, SMOTE
Data & Analytics	:	Pandas, NumPy, Scikit-learn, Tableau, ETL, Feature Engineering, Cross-Validation, Hyperparameter Tuning
Backend & Systems	:	FastAPI, Flask, SQLAlchemy, REST APIs, Microservices, Redis, React, Next.js, Streamlit
Databases	:	PostgreSQL, SQL, pgvector, ChromaDB, SQLite, Redis, MinIO
Dev Tools & DevOps	:	Git, GitHub, Docker, CI/CD, JWT, RBAC, AWS, Linux, Render, Hardhat, Solidity
Core CS	:	Data Structures & Algorithms, OOP, DBMS, System Design, Operating Systems

Experience

AI & Data Analyst Intern — Apr 2026 – Jun 2026
Xylofy AI — *Remote*
- Engineered **FraudGuard AI**, an end-to-end data pipeline and fraud classification engine on skewed transactional data (0.16% fraud rate) applying SMOTE and XGBoost to achieve 94% recall.
- Developed asynchronous REST APIs via Flask with schema validation, batch inference capabilities, and a Streamlit dashboard delivering real-time SHAP model explainability.
- Frontend Live | Backend Live | GitHub Repository

Machine Learning Intern — Jul 2026 – Sep 2026
FlyRank Corp. — *Remote*
- Architected and deployed production-grade ML pipelines (MLOps) for a B2B procurement platform (ProcureMind AI), covering multi-source data ingestion, automated feature engineering, and continuous model training workflows.
- Supported 100+ users in production with controlled API latency; applied hyperparameter tuning and cross-validation benchmarks to maximize predictive accuracy, generalizability, and inference throughput.

Projects

ProcureMind AI – Enterprise B2B Procurement Platform — Aug 2026
Tech Stack: FastAPI, React, PostgreSQL, Redis, LangChain, Render
- Architected a full-stack B2B procurement platform with multi-criteria ranking of vendor quotations across price, SLA compliance, and warranties; served 100+ users with controlled latency.
- Built high-concurrency FastAPI microservices with SQLAlchemy, PostgreSQL connection pooling, and Redis caching for quotation PDF parsing and reports; secured with JWT-based RBAC across Buyer, Approver, and Admin tiers.
- Integrated LangChain LLM orchestration for automated contract risk assessment, negotiation insights, and what-if analysis.
- Frontend Live | Backend Live | Backend GitHub | Frontend GitHub

Tathya – SIH'26 Secure Case & Evidence Management Platform — 2026
Tech Stack: FastAPI, Next.js, PostgreSQL (pgvector), MinIO, Hardhat, Solidity
- Engineered the RAG-based AI layer: OpenCV/OCR ingestion, pgvector embeddings, and permission-aware bilingual semantic search across 5 institutional roles for verifiable legal document retrieval.
- Managed the database layer across PostgreSQL (pgvector) and MinIO object storage, supporting SHA-256 and three-way hash integrity verification for tamper-evident evidence anchored to a local Ethereum ledger.
- Video Explanation (jumpshare.com/share/WmYGfmILiv5ZQVWko305) | GitHub Repository

InsightTube v3.3 – AI Video Intelligence Platform — 2026
Tech Stack: Agno, Llama 3.3, Groq, SQLite, Streamlit
- Engineered an autonomous AI engine that converts long-form multimedia streams into decision-ready executive briefs, action checklists, and takeaways.
- Implemented chronological event mapping with timestamped chapter breakdowns for direct navigation across key technical discussion nodes.
- Built resilient data extraction using `yt-dlp` and `YouTubeTranscriptApi` with SQLite session storage and exportable PDF/Markdown summaries.
- Live Demo | GitHub Repository

Heart Disease Analytics Engine — 2026
Tech Stack: Tableau, Python, Scikit-learn, Render
- Developed an end-to-end clinical data analytics pipeline identifying cardiovascular risk correlations across multi-variable patient biomarkers.
- Constructed interactive Tableau visual dashboards and deployed an analytical web application on Render to present risk factor distributions.
- Live Demo | GitHub Repository

Achievements & Certifications

- **HCLTech AIthon:** Ranked in **Top 200** out of 10,000+ participants nationwide and **Top 3** across KIET Group of Institutions.
- **Smart India Hackathon 2026:** Qualified institutional round; shortlisted for SIH 2026 national screening (NCRB / MHA track).
- **Problem Solving:** Solved **200+** Data Structures and Algorithms problems on LeetCode.
- **Certifications:** AWS Certified Cloud Practitioner | Oracle SQL Database | Red Hat Linux Fundamentals | Deloitte Simulation.
